

I am against changes to expand Low Power FM (LMPF) radio stations, if it would negatively impact our local K-Love radio station. K-Love sponsors many valuable local programs and services, while linking Nebraska to the larger community of listeners. It provides a healthy alternative for youth entertainment programs, and helps make available many live music events locally and regionally in a safe family friendly environment. K-Love sponsored events and programs have changed people's lives. There is not another station that has this type of wide-reaching positive, unifying, impact on our community and state. Please do not take any action that would limit K-Love's reach. Thank-you.
